Small	\$10
Large	\$15-45

ABOUT REPAIRS

Is the garment lined?

Add \$10-15 to repair

Is the repair area accessible? Try laying your hand on the repair and see if the back of the fabric contacts counter without obstruction. Watch for narrow tubes such as pant legs and sleeves.

Add \$10-15 to each obstructed repair

Does the repair require reinforcing an existing seam? (usually simple)

Does the repair require replacing/reinforcing fabric that has worn out, holes in fabric, burns, etc. (What is the client's expectation in terms of results? Do they have a budget/price expectation?)

When repairing damaged fabric, things get more complicated. It is important to make sure that the quality/cost of the repair matches the value of the garment.

Are there elements that obstruct repair such as pockets or zippers?

Add \$10-15 to each obstructed repair.

ABOUT ZIPPERS

Are there teeth missing from the zipper?

Solution – REPLACEMENT

Is the zipper splitting when you try to zip it up?

Solution – ZIPPER HEAD (\$15 repair)

Is the bottom of the zipper damaged? (PIN and BOX in poor condition. Two way zippers have two pins, one with a stopper notch)

Solution – REPLACEMENT
